Who is Kitty's/Daniel's favourite film star?

Kitty's favourite film star

Hollywood's all-time best—Audrey Hepburn

Audrey Hepburn is one of Hollywood's all-time greatest actresses. When she died in 1993, the world felt very sad

- 1 about the loss of a great beauty, a great actress and a great humanitarian.

Hepburn was born in Belgium on 4 May 1929. As a child, she loved dancing and dreams of becoming a successful ballet dancer. After World War II, she moved to London with her mother. She worked as a model before becoming an actress.

In 1951, while acting in France, Hepburn met the French writer Cocteau. Hepburn's beauty and charm caught the writer's attention. Cocteau insisted that Hepburn was the perfect girl for the lead role in *Gigi*, a play based upon her novel, although

- 2 Hepburn had never played any major roles before. This event marked the beginning of her successful career.

Two years later, Hepburn was chosen to play the lead role of a young princess in the Hollywood film *Roman Holiday*. It was a big success and Hepburn soon became world famous. She won the Oscar for Best Actress for her role in this film that year.

During her lifetime, Hepburn had four more Oscar nominations. In 1961, Hepburn made her final appearance in the film *Always* and played the role of an angel.

Hepburn's achievements were beyond the film industry. She began to work for UNICEF in the 1950s. Hepburn spent her last five years working closely with UNICEF so that she could help poor children in different parts of the world. She won many awards because of her efforts in this area.

In 1991, Hepburn discovered that she had cancer. On 20

- 3 January 1993, she passed away peacefully in her sleep.

Lesson 32: Moving Pictures

- What movies have you seen? Name some.
- What kind of movies do you like to watch? Why?

Jenny, Brian and Danny are outside the library. They have just finished doing some research.

Danny: It's hard to believe movies are just over 100 years old.

Jenny: Yes. But like the Internet or other similar technologies, movies have had such a big effect on us.

Brian: I love watching movies. A movie is really an amazing piece of art and technology. I just found out the very first movies were made in France and Germany.

Jenny: That's true. When movies were first created, they were not in colour. They were just moving pictures. Do you know that for those first movies, only a couple of people would act in front of the camera?

Danny: Wow, that's interesting! Movie making is so complex these days. Thousands of people can be involved in making a movie. And some movies, like *Titanic*, can take years to make and cost a lot of money.

Jenny: Do you like *Titanic*, Danny?

Danny: No. I like action movies. I love Bruce Lee and *kung fu* movies. I hope to learn *kung fu* someday.

Jenny: I prefer science fiction. I learn a lot of interesting things from science fiction movies. What about you, Brian?

Brian: I like comedies. I especially like Charlie Chaplin's movies. He was a great actor. Comedies make people laugh and feel happy. I also like cartoons.

Danny: Watching a great movie while eating popcorn is a wonderful thing. I haven't watched a movie for a long time. I hear *Kung Fu Dinosaur III* is on. Why not go and see it this weekend?
